POTENTIAL HEALTH EFFECTS								
ACUTE EXPOSURE EFFECTS								
INHALATION: Irritation of the respiratory tract may occur from inhalation of product mists, especially with prolonged exposure. Synthetic lubricant oil content can produce chemical pneumonitis.								
SKIN: Irritation and itching may occur and prolonged contact may cause dermatitis. The problem may be exacerbated by liquid becoming trapped against the skin by contaminated clothing and shoes; skin absorption can occur in these cases.								
EYES: Tearing, redness and pain may occur; chemical conjunctivitis may result, especially in cases where the eyes are not promptly rinsed.								
INGESTION: Ingestion may result in gastrointestinal irritation, nausea, vomiting, aspiration, and chemical pneumonitis. Product is an aspiration hazard if swallowed due to its synthetic lubricants content.								
CHRONIC EXPOSURE EFFECTS								
Dermatitis may occur from chronic or prolonged skin exposure. Eye irritation may occur with chronic/prolonged eye exposure to product.

MATERIAL SAFETY DATA SHEET

SECTION 3 - HAZARDOUS INGREDIENTS			
Hazardous Components	% (by Weight)	CAS #	
No hazardous components are listed for this product.			
NOTES: This Material Safety Data Sheet is prepared to comply with the United States Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (29 CFR 1910.1200) and the Canadian Workplace Hazardous Materials Information System (WHMIS). Hazard symbols and risk phrases are based on maximum listed concentration of each hazardous ingredient. Unlisted ingredients are not "hazardous" per the OSHA Hazard Communication Standard (29 CFR 1910.1200) or the Canadian Workplace Hazardous Materials Information System (WHMIS) and are considered trade secrets under relevant US and Canadian Federal Laws.			
SECTION 4 - FIRST AID MEASURES			
INHALATION: Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, use mouth-to-mouth resuscitation.			
EYES: Rinse eyes with cool potable water for 5 minutes, then remove contact lenses if present. Wash for at least 10 more minutes with cool potable water lifting upper and lower lids occasionally. Seek medical attention if irritation persists.			
SKIN: Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury. If heated product causes burns, seek medical assistance.			
INGESTION: Contact medical authorities immediately. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs naturally, have victim lean forward to avoid aspiration of regurgitant. Give 1-2 glasses of water to victim if victim is conscious and able to swallow and seek immediate medical assistance. Never give anything by mouth to an unconscious person.			
SECTION 5 - FIRE FIGHTING MEASURES			
DATA RELATED TO FIRE:			
FLASH POINT:	442.4°F / 228°C	AUTO-IGNITION TEMPERATURE:	330°C/ 626°F
FLAMMABLE/EXPLOSIVE LIMITS:	LOWER: 1.8 Vol%	UPPER: 2.4 Vol%	
SENSITIVITY TO MECHANICAL IMPACT/ STATIC DISCHARGE:	None		
GENERAL HAZARDS: Product is minimally combustibile at elevated temperatures. Irritating and/or harmful vapors may be emitted under fire conditions.			
SUITABLE EXTINGUISHING MEDIA: CO2, Dry Chemical, or Alcohol-Resistant Foam.			
UNSUITABLE EXTINGUISHING MEDIA: Choose extinguishing media with respect to total fire hazard. Avoid water streams as this will spread fire.			
FIRE FIGHTING PROCEDURES: Prevent product runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use protective equipment and self-contained breathing apparatus (SCBA), and should fight fire based on total fire hazards. Use of water spray or fog to cool fire exposed surfaces and prevent the rupture of containers is acceptable if runoff control is implemented.			
UNUSUAL FIRE AND EXPLOSION HAZARDS: Product containers will rupture and leak from heat; released product will pose a slip and fall hazard to fire-fighting personnel. Use water spray or fog to cool fire-exposed containers where runoff control is implemented.			
HAZARDOUS COMBUSTION PRODUCTS: Carbon monoxide and dioxide, hydrocarbon compounds, smoke, soot, fumes, - fire conditions only.

SECTION 6 - ACCIDENTAL RELEASE MEASURES			
STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:			
Stop leak if you can do it without risk. Small Spills: Absorb with earth, sand or other noncombustible material and transfer to containers for later disposal. Recover by pumping or with suitable absorbent. Large Spills: Prepare earthen or manufactured dikes ahead of spill; prevent discharge or entry into bodies of water, sewers, basements or confined areas. For large spills or spills on water, contact local authorities and the National Response Center toll-free at (800)424-8802. Avoid direct discharge to watercourses.			
SECTION 7 - HANDLING AND STORAGE			
PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:			
Handling: Prevent small spills and leakage to avoid slip hazard. Wear personal protective equipment. Keep containers tightly closed. Do not store with incompatible materials. KEEP OUT OF THE REACH OF CHILDREN.			
Storage: Do not store in open or unlabelled containers.			
SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION			
Component	CAS #	ACGIH Exposure Limits (mg/m³ unless otherwise noted)	OSHA Exposure Limits (mg/m³ unless otherwise noted)
No exposure regulated components are listed for this product.			
PERSONAL PROTECTION			
RESPIRATORY PROTECTION:			
Not required for normal work situations where adequate ventilation is provided. Use NIOSH European EN-149 approved self contained, positive pressure respirators or Self-Contained Breathing Apparatus (SCBA) for emergencies and in situations where air may be displaced by vapors. Follow OSHA Std. 29CFR 1910.134.			
PROTECTIVE GLOVES:			
Use impervious gloves if there is prolonged or repeated contact of liquid with skin. Solvex gloves recommended.			
EYE PROTECTION:			
Safety glasses with side shields required.			
OTHER PROTECTIVE CLOTHING OR EQUIPMENT:			
No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.			
ENGINEERING CONTROLS:			
Eyewash fountain or emergency eyewash bottle should be present in work area. Personal protective clothing and use of equipment must be in accordance with 29CFR 1910.132 and 29CFR 1910.133.			
WORK / HYGIENIC PRACTICES:			
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.
